DELTA 10X Xenon Light Bar for Hummer H2 and SUT

DELTA 6X Xenon Light Bar for Hummer

DELTA 5X Xenon Back-up Light Bar for Hummer H2 and SUT

Delta Hummer Lighting Accessories made their debut in 2004 with the introduction of the DELTA 10X Light Bar, the first light bar built around the original GM cross-bar. The 10X Light Bar fits over the existing factory roof railing on the H2 and H2 SUT models. The 10X Light Bar is equipped with 8 DELTA Xenon long range water-proof lights, which operate via dual wiring harnesses, independently controlling 4 or all 8 lights. DELTA 5X Back-up Light Bar was later developed to complement the 10X Light Bar, which incorporates 4 Xenon Flood Lights and are activated by the reverse gear.

In 2006, Delta Tech Industries has introduced the DELTA 6X Light Bar, which fits Hummer H3 models only. It is equipped with 6 DELTA Xenon long range lights. The 6X Light Bar, like the 10X Light Bar, is also equipped with a dual wiring harness, which controls 2, 4 or all 6 lights.

NEW for 2009 Delta has introduced the DELTA 4X - H.I.D. Light Bar for Hummer H2 and SUT. The new HID Light Bar is equipped with 4 HID Systems each powered by the built-in ballast and producing an awesome near day light illumination but consuming less than 12 Amps.
